

SGR FAASTeam presents:

General Aviation Fatal Crashes (2002-2012). What We Can Learn!

Douglas Boyd, Ph.D. (University of Texas) researches trends and causes of fatal general aviation accidents over the last decade publishing his results in peer-reviewed journals including Accidents Analysis/Prevention and Aviation, Space and Environmental Medicine. Dr. Boyd is also a regular contributor to IFR and IFR Refresher aviation magazines. For this seminar, trends and causes of fatal general aviation accidents over the last decade will be presented focusing on instrument rated and non-instrument rated private pilots. The causes of fatal accidents in VMC, IMC and for operations at night will be discussed with examples of each type cited.

Directions: Located at Sugar Land Regional Airport, Anson Aviation. Turn off Hwy 6 S. onto Terminal Ln, turn first left onto Jim Davidson Rd. and drive to first parking area on the right in the General Aviation Area.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
